APPENDIX (1)

Hazard and Incident Reporting Procedure

Definitions

Hazard:- a source or situation with the potential to cause harm, in the terms of injury, ill-health, property damage, or damage to the environment.

Incident:- an accident or occurrence (including a near miss) that has caused an injury, illness or damage. Reporting and recording of incidents is an important component in hazard control, risk management and incident prevention. To ensure the safety of our workplace, all hazards and any incidents that occur on the school premises or during off-campus school excursions should be reported as soon as possible. Even if you believe it may have already been reported, if you discover a hazard it should be reported.

Procedure

Reporting a Hazard

If a hazard is identified during the day and can be remedied safely and immediately staff should rectify as best they can to maintain a safe work environment. A Hazard Report Form should also be completed as soon as possible so that follow up actions can be performed and any further risks can be rectified.

If a hazard is potentially serious or life threatening, staff should alert someone else for help, without putting themselves in danger. They should stay close to the scene and warn of the danger until appropriate help arrives. A Hazard Report form should be completed as soon as possible so that an action plan for resolution can be created.

Reporting an Incident

If a staff member, student or visitor has been injured, this should be reported and recorded on an Incident Report Form. If first aid is required a trained First Aid Officer should be contacted immediately.

Notes

- All information collected on Hazard and Incident Report forms is under the authority of the Work Health and Safety Act 2011 (Qld) the Work Health and Safety Regulation 2011 (Qld) and protected under the Privacy Act 1998.
- All Hazard and Incident report forms are accessible in hard copy at the office or via a link in Sharepoint.
